Introduction

Congratulations! You now own a Rolodex® Electronics Caller ID. Your Caller ID can:

- store up to 90 call records, including information such as caller's name, and/or phone number, and the time the call was placed, if available,
- alert you when new calls have been received,
- display the current time and date,
- display the total number of calls received,
- display prompts and screen displays in one of three languages: English, French, or Spanish,
- alert you when you have messages waiting, if you have a voice mail service from your phone company, and
- be used on a desktop or be mounted on a wall.

Important! To operate your Caller ID, you must first contact your phone company and order Caller ID service. There is a charge for Caller ID service, which will appear on your monthly phone bill. Caller ID service may not be available in all areas.

Introduction

Getting Started

To Install the Battery (Not Included)

Note: The Caller ID will not function without a battery.

- 1. Disconnect the telephone line.**
- 2. Lift the battery compartment door on the back of the Caller ID.**
- 3. Install a 9-volt battery.**
- 4. Replace the battery compartment door.**

To Connect the Telephone Line

- 1. Connect one end of the telephone cord into one of the jacks on the back of the Caller ID (either jack can be used) and connect its other end into the wall jack.**
- 2. Connect one end of the included telephone cord into the other jack on the Caller ID and connect its other end into your telephone.**
- 3. If desired, use two anchor screws to mount your Caller ID on a wall.**

Changing the Settings

Caution: When you press SET to change a setting, that setting will flash on the screen for about 5 seconds. If you do not adjust the setting and then press SET during this time, the settings will remain unchanged.

To Set the Time and Date

1. Press SET until **ENTER TIME** appears and the hour is flashing.

2. Use ▲ or ▼ to adjust the hour.

You can also adjust AM and PM on the 12-hour clock while adjusting the hour.

Note: When the language is set to English, the clock is a 12-hour clock which can be set to AM or PM. When the language is set to French or Spanish, the clock is a 24-hour clock.

3. To set the minutes, press SET until **ENTER TIME** appears and the minutes are flashing and then use ▲ or ▼.

4. To set the month, press SET until **ENTER DATE** appears and the month flashes, and then use ▲ or ▼.

5. To set the day, press SET until **ENTER DATE** appears and the day flashes, and then use ▲ or ▼.

If you do not want to set the language or area code, wait 5 seconds for the flashing to stop.

Changing the Settings

To Set the Language and Area Code

1. To set the language of the screen prompts, press **SET** until **IN ENGLISH?** appears.
2. Use **▲** or **▼** to set a language.
3. To set your area code, press **SET** until **ENTER AREA CODE** appears and the first digit of the area code flashes.
4. Use **▲** or **▼** to change the first digit.
5. To change the other digits, press **SET** until the desired digit flashes and then use **▲** or **▼**.

Note: If your area code has three digits, press **SET** again when the fourth digit flashes.

After you have set the area code, your Caller ID displays the current date and time.

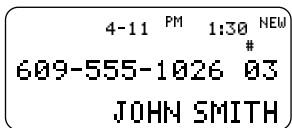

4-11 AM 10:30

Receiving Calls

When the telephone connected to the Caller ID rings, new call information appears between the first and second ring. If you answer before the second ring, the Caller ID will not display any information.

When a call is received, the Caller ID displays a call record, which can include, if available, the name of the caller, the caller's telephone number, and the time that the call was placed. The amount of information displayed depends on the signal sent by your phone company.

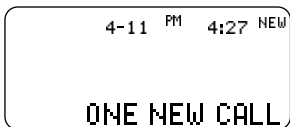

If the call is from outside your phone company's area, some of the caller's information may not be available and *UNKNOWN NAME* and/or no number may be displayed.

The NEW Call Indicator Light will flash for about 15 seconds after a new call is received.

If the caller's name or number is blocked by the caller, that information will not be displayed.

Reviewing Calls

This Caller ID automatically stores the call information from the last 90 calls. If you have not received any new calls, the Caller ID will display the date, time, and number of total calls, if any. If you have received new calls, the screen will display the appropriate number (ex: *03 NEW CALLS*).

1. To review your new calls, press ▲ repeatedly.
2. To review your old calls, press ▼ repeatedly.

When you reach the end or top of the list, press the opposite direction key to cycle back through your call records.

Reviewing Calls

✓ About Message Waiting

Your Caller ID can alert you to check your phone's messages if you have a voice mail service from your phone company that offers Caller ID signalling. For more information about these services, contact your phone company. When you have a new message, the phone company will send a signal to your Caller ID that causes the MSG light to blink and a marker to appear on the display the next time you receive a call. After your messages are reviewed, the phone company sends a signal to clear the display and stop the MSG light from blinking.

✓ About Repeat Calls

Your Caller ID will save information from the same name and/or number, but will use only one call record to store the information. Each time a call is received from the same name and/or number, the time and date of the call record is updated and a REP marker appears near the time.

✓ About Toll Calls

If your phone company's service supports it, your Caller ID will display a toll call marker (\$) to indicate that the call received is a toll call.

Deleting Calls

To Delete Individual Calls

When you are reviewing a call record, you can delete it from your Caller ID's memory.

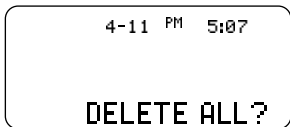

1. Use ▲ or ▼ to find the call record you want to delete.
2. Hold DEL for about 1 second.

The call record will be deleted and the next call record will be displayed.

To Delete All Your Calls

1. Use ▲ or ▼ until you see **TOP OF LIST** or **END OF LIST**.
2. Hold DEL until **DELETE ALL?** appears.

Warning! If you continue with these steps all your call records will be deleted.

DELETE ALL? is displayed for about 10 seconds.

3. To delete all your calls, hold DEL for about 1 second while **DELETE ALL?** is on the screen. Or press any other key to cancel.

Troubleshooting

✓ When the Battery Is Low

When the battery is low on power, the low battery marker (⌘) appears on the display. You should change the battery as soon as possible to ensure normal operation.

Warning! Your call records may be erased if the Caller ID is without a battery for more than 20 seconds, so be sure to have a fresh battery on hand before you remove the old battery.

To learn how to install a battery, read “Getting Started.”

✓ About Error Messages

If *ERROR* appears while receiving call information, then that information is corrupted and may not appear on the display.

✓ Safety Instructions

When using your Caller ID, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Follow all warnings and instructions marked on the product.
- Do not use this product near water.
- This product should never be placed near or over a radiator heat register.

Troubleshooting

- To reduce the risk of electric shock, do not disassemble this product. Take it to a qualified serviceman when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
- Unplug this product from the telephone lines and refer to qualified service personnel under the following conditions:
 - A. If the product has been exposed to liquid.
 - B. If the product has been dropped or the case has been damaged.
 - C. If the product exhibits a distinct change in performance.
- Avoid using during an electrical storm. There may be a remote risk of electric shock from lightning.
- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected from the network interface.

Limited Warranty (U.S. only)
